# WEDDING PACKAGES

Thoughtful coverage. Beautifully edited. Built around your day.

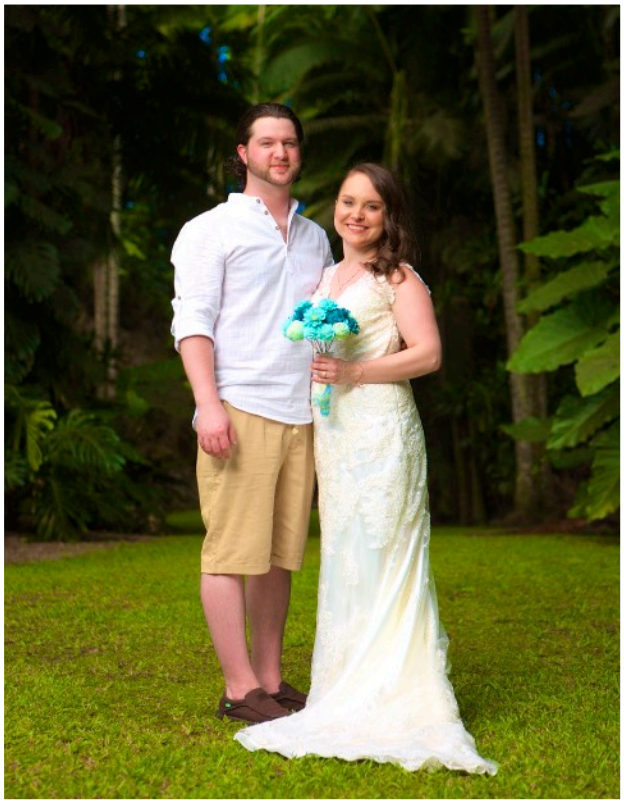

# Be present for the day. Keep the feeling for years.

The best wedding photographs come from a day you were free to actually experience. These collections are designed around thoughtful planning, calm coverage, and enough flexibility for the people, emotion, and unexpected moments that make your celebration uniquely yours.

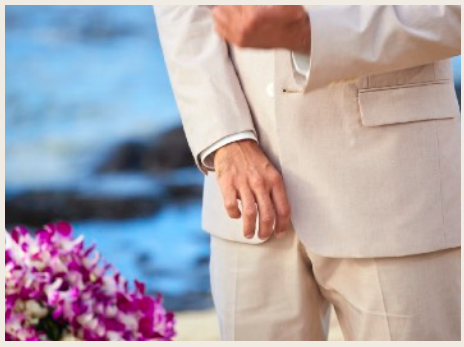

**ONE PHOTOGRAPHER, ONE VISUAL VOICE.**

From our first conversation through the final photographs, you know who is telling your story. Jesse personally photographs every wedding, so the person you plan with is the same person beside you when the day finally arrives.

That familiarity means the photography feels calm and natural, not intrusive, while still following the timeline and priorities we shaped together. And when it's over, that same perspective shapes the edit, so the whole collection feels connected and unmistakably yours.

## YOUR WEDDING SHOULD FEEL LIKE YOUR WEDDING

You should be able to experience the day, not spend it worrying about the photography. The laughter, the nerves, the people you love, the little moments you never planned for, those are often the things that become most meaningful afterwards. These collections are designed to give your story enough room to unfold naturally. We plan what matters, create space for beautiful portraits, and then allow the day to breathe because years from now, your photographs should bring back how it felt.

The right amount of coverage simply gives the day enough room to be remembered as it was lived.

Eight hours gives your wedding day room to unfold without feeling rushed, from the anticipation of getting ready through the ceremony and portraits and deeper into the celebration. INCLUDED ON A SEPARATE DAY
